➢ Having **7+ years** of experience in developing Mobile/Web-based Applications using **Power platform** Technologies.
➢ Hands on experience on technologies like **PowerApps - Canvas apps**
➢ Hands on experience on technologies like **Power Automate, MS Forms, Adaptive Cards.**
➢ Hands on experience on technologies like **Center of Excellence (CoE)**
➢ Hands on experience on technologies like **SharePoint Online**
➢ Good Team player but also has ability to work independently with minimal Supervision to meet deadlines.
➢ Excellent analytical, problem-solving, and interpersonal communication skills.
➢ Team player, highly productive and result-driven in team and individual projects and time management skills.
➢ Adaptive to learn new technologies.
➢ Hands on Experience in Agile Methodology.

Professional Experience:
● Currently Working with **Wessex Water, Malaysia** as **Power Apps Developer** Oct 2022 to Till Date.
● Previously Worked with **Infisecure Technologies Pvt Ltd, Mumbai** as **Software Engineer** April 2021 to Aug 2022.
● Previously worked with **Techwave, Hyderabad** as **Senior Design Engineer** December 2019 to March 2021.
● Previously worked with **CYIENT, Hyderabad** as **Telecom Engineer** April 2016 to December 2019.

Educational Qualifications:
● **B.Tech** from J N T University, Anantapur, **A.P**, in the year **2013** with **73%.**

Technical Skills:

CMS	**SharePoint, Office365**
Programming languages	**PowerApps (Canvas apps, Model driven apps)**
Tools	**SVN, TFS**
Software tools	**AutoCAD, Cocon, Geos, Brics Cad, 3GIS**

Project Details:

Project #1

Title	: **Power apps construction**
Client	: Wessex Water, UK.
Technologies	: Microsoft Power Apps, Power Automate, MS Forms and SharePoint
Role	: Power Apps Developer
Team Size	: 3
Duration	: Oct 2022 to Till date

- Hands on experience in Power Platform (Power Apps and Power Automate)
- Experienced in automating business processes with Power Automate using Connectors with Power Apps, Power Automate.
- Experience with developing Power Apps applications.
- Interacting with teams to get data requirements

Project # 4 (From Dec 2019 to March 2020)

Title	: Planning & designing of Fiber network for KPN
Customer	: KPN, Netherlands
Worked Company	: Techwave, Hyderabad
Software's used	: Citrix, Geos FOW, BricsCAD

Responsibilities Include:

- Downloading input to the Project Exchange.
- Input checking, if input is ok continue with production, if input is not ok we will raise the par
- With the help of input reference, we will design the Brics CAD and Geos.
- Generating the stack lables.
- We will design the Geos by the reference of Brics CAD.
- Preparing deliverables for the project.
- Finally deliver the project through Project Exchange.

Project # 5 (From April 2016 to Nov 2019)

Title	: VWT(PLANING AND DESIGNING)
Customer	: VWT, Netherlands
Worked company	: Cyient, Hyderabad
Software's used	: Auto cad, Cocon

Roles and Responsibilities: Planning(Tele2)

- Downloading input to the dashboard
- Input checking, if input is ok continued with production, if input is not ok we will raise the par
- With the help of input reference we will design the cocon.
- First in the cocon we are drawing the building and giving the location number
- After we will take fiber design and fiber sheet from Nano cad
- With the help of fiber design we will plan the our location in the fiber design.
- After we will plan the which fibers we need to splice in the Handhole
- We will create our local fiber design and fiber sheet
- With the help of Glob spotter Preparing work drawing and permit drawing in AutoCAD
- Applying permit document in WOW portal.
- Finally Delivering through dashboard.

Project # 6

Title   : METRONET (PLANING AND DESIGNING)
Customer   : METRONET, USA
Worked company   : Cyient, Hyderabad
Software's used   : 3GIS

Roles and Responsibilities:

- Frist we are checking address and network validation with the help of county maps.
- After completion address validation we will done the planning.
- In this planning we are grouping the buildings and placing the splitters.
- After that giving feeding to the fiber network.
- With the help of planning, we can designing the fiber network in 3GIS.
- In designing we are placing the splitters and splitter boundaries.
- Drawing the cables.
- Giving the cable sizes and naming's.
- For all work done i.e placing loops, attributes.
- Finally, we are giving splicing to the proposed fiber network.

Declaration
